Project Phase 1 (intermediary)

Presentation with key elements:

- Overview of the project/idea
- Data acquisition / crawling details
- Dataset descriptives
- Intended analyses

Slot: 10 minutes (5-7 minutes presentation followed by discussions)

GitHub Repo structure:

/**extraction**: scripts for crawling, data preprocessing
/**data**: raw (or link if too large)
/**docs**: presentations (pdf or pptx)

Project Phase 2 (final)

Presentation with key elements:

- Exploratory Data Analysis
- Performed predictions - results, comparisons with various models
- Error analysis

Report (max 10 pages) - Structure similar to a scientific paper

- Abstract
- Introduction
- Related Work/State-of-the-Art
- Method
- Results
- Discussion
- Conclusions
- Biography

To be posted on GitHub: the entire project and documentation

Slot: 10 minutes (max 7 minutes presentation followed by discussions)

GitHub Repo structure:

/**extraction**: scripts for crawling, data preprocessing
/**analysis**: scripts for ML models
/**data**: raw + final datasets (or links if too large)
/**docs**: 2 (intermediary + final) x presentations (pdf or pptx) + *final report* (Word, pdf)
